

## PUBLIC NOTICE - BARTON ROAD REPAVING

This is to notify residents of Loomis of the latest schedule to repave Barton Road. As part of the Sierra de Montserrat subdivision the Town required improvements on Barton Road that include paving work by the developer and the Town. Removal of the existing asphalt revealed unsuitable base material and water saturated soils. Before paving can take place, the underlying soil must be stabilized and compacted to meet current construction standards. Due to these unexpected conditions the Town and the contractor have had to make adjustments in the process and timing of the project.

The following schedule and traffic plan are being implemented immediately to alleviate the difficulties encountered by motorists traveling on Barton Road.

**SCHEDULE:** May 14 to May 22 = Soil stabilization      May 23 to MAY 27 = Re-paving  
To meet this schedule, roadwork will occur on weekends and for extended hours.

**TRAFFIC PLAN:** During the remainder of construction, traffic will be re-routed as follows:

Flag persons will be posted at road closure points on Barton Road and Wells Avenue during hours of construction. A strict 25 mph speed limit will be in place throughout the construction area as well as on the detour route.

Questions should be directed to Darren Neishi, Public Works Department during week days 9AM to 4PM at 916-652-1840 or [dneishi@loomis.ca.gov](mailto:dneishi@loomis.ca.gov) and after hours or weekends to Avelardo Yanez 202-5268.
